

CERTIFICATE

OF COMPLETION

THIS IS TO CERTIFY THAT

Estel Dritaliana Dina

has successfully completed the "Introduction to Cyber Security" course.
The 12-hour course covered fundamental cybersecurity concepts, online threats, password security and authentication, basic cryptography, network fundamentals, technical reconnaissance, and practical cybersecurity challenges.

Attestation of Completion

Course: Introduction to Cybersecurity

Duration: 12 Hours

This attestation certifies that the participant has successfully completed the Introduction to Cybersecurity course, organized by the Centre for Development and Advanced Training in Albania (C-DATA), in collaboration with the Canadian Institute of Technology (CIT).

Course Summary

This introductory course provided participants with a practical understanding of fundamental cybersecurity concepts and online safety practices. Delivered over 12 hours across 6 sessions, the program introduced students to common cyber threats, password security, authentication methods, basic cryptography, network fundamentals, and technical reconnaissance concepts. Through interactive activities, scenario-based learning, and gamified challenges, participants explored how cybersecurity impacts everyday digital life and learned essential strategies for protecting information and digital identities.

Key Achievements

1. Identified common cyber threats and suspicious online behavior
2. Applied basic cybersecurity practices, including password protection and authentication
3. Understood the role of encryption and simple cryptography techniques
4. Explained basic networking concepts and digital communication processes
5. Recognized how information can be gathered and potentially misused online
6. Analyzed practical cybersecurity scenarios and proposed basic solutions

Tools and Technologies Used

- Visual presentation materials and real-world case examples
- Simple cipher and encryption tools
- Network visualization diagrams
- Interactive cybersecurity challenges and exercises

Learning Outcomes

- Recognize common cybersecurity threats
- Apply safe online practices
- Understand basic encryption concepts
- Explain how simple networks function
- Identify risks related to digital information sharing
- Develop problem-solving and critical-thinking skills in cybersecurity contexts

Assessment

- Participation in practical activities
- Scenario-based exercises
- Final cybersecurity mini-test

Acknowledgment

Issued by: C-DATA in collaboration with the Canadian Institute of Technology (CIT)

Course Duration: From April 28, 2026 to May 14, 2026

Date of Completion: May 15, 2026
